I. ORGANIZATIONAL ISSUES

Mission Statement

We serve as part of a team that provides the environment in which the mission of Yale University is achieved in a cost effective and efficient manner. The value we add is in facilitating – managing – the process of creating some of those environments. We strive for full satisfaction of all stakeholders' needs and requirements at all times, in all activities. The portfolio of ongoing projects is the framework in which we manage our movement toward physical environments that reflect institutional needs.
