Designer Note: The ICT Designer shall provide designs that fully document and incorporate Yale IT Standards and best practices into projects. This Appendix contains photographic documentation, for reference only, that is indicative of final approved installations. It shall be incumbent upon the ICT Designer to provide designs and construction administration to achieve final approved installations as documented in this Appendix. Some photographs are labeled “Incorrect Installation” which depict bad practice to be avoided. Coordinate with Yale IT to confirm the existence of updates and revisions not yet incorporated into this documentation.

APPENDIX D – SECURITY SYSTEMS PHOTOGRAPHIC DOCUMENTATION

Security Systems Photo 1 – Labeled Integrated Mortise Card Reader with Door Position Switch and Request to Exit Switch ................................................................................................................................. 2
Security Systems Photo 2 – Access Controlled Single Door with Integrated Reader ......................................................... 3
Security Systems Photo 3 – Access Controlled Double Door with Integrated Card Reader ................................................. 4
Security Systems Photo 4 – Integrated Card Reader, Right Hand Reverse Leaf of Double Door ...................................... 5
Security Systems Photo 5 – Access Controlled Vivarium Door ................................................................................................. 6
Security Systems Photo 6 – Access Control Panel Wallfield on Backboard in Telecom Room ......................................................... 7
Security System Photo 7 – Access Control System Panel Terminations ................................................................................ 8
Security System Photo 8 – Access Control System Power Supply .......................................................................................... 9
Security System Photo 9 – Access Control Panel Labeling .................................................................................................. 10
Security System Photo 10 – Access Control Composite Door Cabling Separated from Network Cabling within Telecom Room Cable Runways .................................................................................. 11
Security System Photo 11 – Alarm Panel (DMP) and Keypad Located at the Building Main Fire Alarm Panel for Central Station Communications ......................................................................................................................... 12
Security System Photo 12 – Intrusion Detection System Alarm Keypad ................................................................................. 13
Security System Photo 13 – Door Management Alarm Panel with Key Override ................................................................. 14
Security System Photo 14 – Emergency Exit Only Door with Door Management Alarm Panel .............................................. 15
Security System Photo 15 – Exterior Entry Bollard with Card Reader, Automatic Door Push Pad Actuator ......................... 16
Security System Photo 16 – Exterior Entry Bollard with Card Reader, Automatic Door Push Pad Actuator ......................... 17
Security System Photo 17 – Video Intercom Substation at Exterior Entry Door ................................................................. 18
Security System Photo 18 – Interior Emergency Telephone Call Station .............................................................................. 19
Security System Photo 19 – Exterior Emergency Telephone Call Station .................................................................................. 20
Security System Photo 20 – Exterior Emergency Telephone Call Station with Blue Light Strobe and Security Camera .............................................................................................................................................. 21
Security System Photo 21 – Exterior Pole Mounted Emergency Telephone ............................................................................... 22
Access Control Photo 22 – Exterior Pole with Emergency Telephone, Blue Light Strobe, and Multi-Imager Security Camera .............................................................................................................................................. 23
Security System Photo 23 – Exterior Pole with Emergency Telephone, Blue Light Strobe, and 360 Degree PTZ Security Camera .............................................................................................................................................. 24
Security System Photo 24 – Exterior Wall Mounted 180 Degree Security Camera with Custom Painted Casing ................................................................. 25
Security System Photo 25 – Ceiling Mounted Security Camera ................................................................................................. 26
Security System Photo 26 – Morse Watchman Electronic Key Box .............................................................................................. 27
Security System Photo 27 – Milestone NVR Equipment Rack ........................................................................................................... 28
Security System Photo 28 - Milestone NVR Equipment Rack ........................................................................................................... 29
Security Systems Photo 1 – Labeled Integrated Mortise Card Reader with Door Position Switch and Request to Exit Switch
Security Systems Photo 2 – Access Controlled Single Door with Integrated Reader
Security Systems Photo 3 – Access Controlled Double Door with Integrated Card Reader
Security Systems Photo 4 – Integrated Card Reader, Right Hand Reverse Leaf of Double Door
Security Systems Photo 5 – Access Controlled Vivarium Door
Security Systems Photo 6 – Access Control Panel Wallfield on Backboard in Telecom Room
Security System Photo 7 – Access Control System Panel Terminations
Security System Photo 8 – Access Control System Power Supply
Security System Photo 9 – Access Control Panel Labeling
Security System Photo 10 – Access Control Composite Door Cabling Separated from Network Cabling within Telecom Room Cable Runways
Security System Photo 11 – Alarm Panel (DMP) and Keypad Located at the Building Main Fire Alarm Panel for Central Station Communications
Security System Photo 12 – Intrusion Detection System Alarm Keypad
Security System Photo 13 – Door Management Alarm Panel with Key Override
Security System Photo 14 – Emergency Exit Only Door with Door Management Alarm Panel
Security System Photo 15 – Exterior Entry Bollard with Card Reader, Automatic Door Push Pad Actuator
Security System Photo 16 – Exterior Entry Bollard with Card Reader, Automatic Door Push Pad Actuator
Security System Photo 17 – Video Intercom Substation at Exterior Entry Door
Security System Photo 18 – Interior Emergency Telephone Call Station
Security System Photo 19 – Exterior Emergency Telephone Call Station
Security System Photo 20 – Exterior Emergency Telephone Call Station with Blue Light Strobe and Security Camera
Security System Photo 21 – Exterior Pole Mounted Emergency Telephone
Access Control Photo 22 – Exterior Pole with Emergency Telephone, Blue Light Strobe, and Multi-Imager Security Camera
Security System Photo 23 – Exterior Pole with Emergency Telephone, Blue Light Strobe, and 360 Degree PTZ Security Camera
Security System Photo 24 – Exterior Wall Mounted 180 Degree Security Camera with Custom Painted Casing
Security System Photo 25 – Ceiling Mounted Security Camera
Security System Photo 26 – Morse Watchman Electronic Key Box
Security System Photo 27 – Milestone NVR Equipment Rack
Security System Photo 28 - Milestone NVR Equipment Rack
